Level	Undergraduate						
Year / Semester	Year 6/ Semester 12 (Spring)						
Teacher's Name	Course Lead: Dr Evgenios Metaxas						
ECTS	10	Lectures / week	0	Laboratories / week	0	Clinical Practice	40
Course Purpose and Objectives	<p>During their Clinical Attachment Elective students have the opportunity to broaden their experiences in anything that may be relevant to their future career in medicine. In this course students spend six weeks on a chosen activity or medical specialty of their choice. Students are encouraged to broaden their experiences by undertaking their elective in a different environment and at greater depth to that already experienced. For example, students may use their final elective as an opportunity to observe a healthcare system in a different country. The objectives of the course are to:</p> <ul style="list-style-type: none"> • Ensure students enrich their experiences by working with multi-professional health care teams • Assist students reflect upon their experiences and develop plans for professional development. 						
Learning Outcomes	<p>On completion of the course students are expected to be able to:</p> <ol style="list-style-type: none"> 1. Understand the role of the multi-professional health care teams in different clinical settings. 2. Reflect on their experiences when working with multi-professional healthcare teams on different clinical settings. 3. Develop plans for future professional development.
